So, everything has been described in detail, and if you get what you need, then you can download this post. If you have been working on it, then you would not have to put much more effort into this; and hence, here we are with our driver installation guide that can help you with any driver problems. Even though this guide is for drivers for Realtek card, you will be able to figure out how to do it for other cards as well. Just follow along with this guide and if you need any help, then we are always at your service to help you out. In case, this guide does not help you, then we will also try to help you out. If you have any questions, then you can always ask us via the comment box below, and we will try to answer it as soon as we can. In case, you are having any driver problems, then we can help you out in the best way possible. We will not charge you a penny and you do not have to pay anything; but all we ask from you is to share this guide with your friends, so that we can get feedback and make it better for the next readers. Please Note: Before you proceed, you must have the latest version of Windows Operating System. How to install the Realtek Driver (We will guide you step by step) Turn off your PC, and wait for a while. You can now install the driver by following the below steps: Double-click on the downloaded file to extract the driver; Restart your PC, and then open the device manager; In the device manager, right-click on the Realtek WLAN USB Adapter, and select uninstall; Now, go back to the previous menu, select the Device Manager, and then select the driver tab; Now, right-click on the driver, and select Uninstall; Go back to the main menu, and then select Add/Remove Programs; In the window that appears, select Installed Drivers, and then click on Next; The driver will now be removed. Go back to the main menu, and then select Update driver; If you already have the latest driver, then you will be asked to select from a drop-down list. If you don't, then you will be shown a list of available drivers. Click on the Browse My computer button, and then navigate to the location where you have 82157476af
